Customer information on **MTTFd**- values

(**Mean Time To Failure**)

The MTTFd is a statistical value and defined in the EN ISO 13849-1 as the „mean expected time until a dangerous failure occurs“.

The MTTFd- values for **pressure transmitters** manufactured by halstrup-walcher GmbH have been determined to be as follows:

Type PS 27: 45 years
Type P 26: 15 years
Type P 29: 15 years
Type P34: 18 years

The MTTFd- values for **positioning systems** manufactured by halstrup-walcher GmbH have been determined to be as follows:

Type PSE32xx: 10 years

These values are statistical, i.e. they have been determined empirically. They do not imply a “guaranteed service life” or “failure-free period”.
