General customer information on EG Nr. 1907/2006
(REACH, **R**egistration, **E**valuation and **A**uthorisation of **C**hemicals)

The chemical regulation REACH for registration, evaluation and authorisation of chemicals is established in all EU member states on 1st January 2007.

Considering of the three elements of registration, evaluation and authorisation of chemicals REACH will build up a comprehensive management of chemicals to ensure high safety standards of environmental and health risks upon the use of chemicals in the EU member states. Not only manufacturers and importers of chemical are obliged to do a preregistration and registration but also the users of these chemicals have to give complete information and do registration due to the flow of information for the lifetime of the chemicals. The obligation for registration and evaluation applies for manufacturers, importers or users which manufactures, import or use more than one ton of chemical substances per year. Particularly hazardous substances are additionally subjected to authorisation.

We hereby confirm, that the sales products of halstrup-walcher GmbH do not contain any substances in a concentration of > 0.1%, which are listed in the actual SVHC list of ECHA (Dated 08.07.2021, in total 219 substances).
